Friday	Ultimate MAX Rapide ForteX4 Mycoform-t	Protein Perform Wheatgerm Oil
Saturday	Rapide ForteX4 Prolyte	Wheatgerm Oil
Sunday	Prolyte	Protein Perform Wheatgerm Oil

NOTES & TIPS

Aviform products are designed to be combined together in drinking water, as required.

Aviform oil based products can be mixed together in feed.

Moisten corn with a small amount of RocketFuel MCT Oil when using Protein Perform.

Force 12 DMG+ can be used as a lower cost (but lower spec) alternative to Rapide ForteX4.

Eradi-Mite can be added to drinking water, combined with any Aviform product for effective mite control.

Aviform products not on the above plan:

Vitaflight - a lower cost but much less comprehensive alternative to Ultimate MAX. Electroform lower cost alternative to Prolyte without probiotics.
